

Stampede Success Now Certain

Gleichen's 1915 Stampede is just one week from today and gives promise of being one of the big events of the year. From all parts of Western Canada enquiries come pouring in by every mail asking information about the various events on the program, about accommodation and a dozen other things.

The management are thoroughly satisfied with the way things are shaping up and all the arrangements for handling a big crowd of visitors are well under way.

Entries are coming in fast, especially for the more spectacular event, notable among which is the 'Wild Horse Race'. Last year among a superabundance of good things this event stood in a class by itself and was easily the most hair-raising of all the program. Madly fighting and pawing the air, biting, plunging, kicking and rolling, showing every diabolical vice of concentrated equine fury while the riders and their assistants put forth every effort with varying success to saddle their allotted mounts. Occasionally several fear-maddened brutes would get together and then for a few minutes nothing could be seen but a confused struggling mass of horses and men. One or two of the horses managed to break away from the holders, but at last, after more than thirty minutes of continuous excitement and numerous hairbreadth escapes the signal to mount was given. Twenty frenzied, bucking furies, not a

sulker among them, careered madly down the field and despite the best efforts put forth by the riders to stay on their mounts not a few were piled, much to their disgust, but as a bucking display it was superb, and much more meritorious than the individual bucking contests, good as they were.

Another event which created a good deal of merriment, the "steer riding", is also filling up fast. Last year we had the unusual spectacle of a lady rider in this contest but she was piled at the second stride and for a few seconds her face was a picture as she gazed after the fast vanishing steer.

The cowboy turn race and the relay race while not quite so spectacular as some of the other events always create a good deal of interest, showing what a well trained horse is capable of and acting as an admirable contrast to the displays of the wild horses. The cleverness of some of these horses is remarkable and counts for as much as the skill of the rider in winning the events. A good entry has been secured and those who love a well trained horse will see something worth looking at.

The Canadian Pacific Railway anticipate extra heavy traffic to Gleichen on both days and have made arrangements to put on additional specials to meet the requirements if necessary.

Judges & Timekeepers

Much care has been taken in selecting the judges and time keepers and the committee is pleased to be able to obtain the consent of the following gentlemen to act:

JUDGES

O. H. Olcott, of Majorville.

Herb Miller, foreman of George Lane's ranch at Namaka.

James Mitchell, Medicine Hat.

Chas. Dawson, of Aden Alberta.

TIME KEEPERS

Dr. McKay, V. S., Calgary.

W. Stuart, of the Stuart Lumber Co. Calgary.

R. G. Rutledge, Calgary.

All roads lead to Gleichen on June 24th and 25th. Follow the crowd. You will get your money's worth and will be helping the patriotic purposes to which the proceeds are to be devoted.

Sleeping accommodation is being provided for and all may rest assured that they will be well taken care of.

The orchestra for the dance will be the best obtainable in Calgary.

The Ranchers Club has come through with \$100 and it is fully expected that several other clubs in Alberta will more than follow the lead now that they understand the good cause it is aimed to give the benefit to.

A good band is being arranged for to disperse music on the grounds each day.

Arrangements have been completed with the Pantages' Theatre Co. of Calgary to stage a first-class entertainment each night in the Opera House, which will be followed by a dance.

When you are participating in this Stampede remember the proceeds go towards the widows, orphans and maimed soldiers of this district. This is a noble cause. The benefits go to those right at home; those who you or your friends know. Perchance to a dear relative. And there will be no question as to how it is spent.

Prizes Donated To Date

It is most pleasing to see that so many are ready to take such an active part in this Stampede which is undoubtedly for the reason that the proceeds are to go to the benefit of widows, orphans and maimed soldiers of this district. Appended is a partial list of those who have been kind enough to donate prizes to be contested for. There are a number of others who are offering prizes, full particulars of which are not obtainable at this writing but will be published in our next issue.

Gleichen Hotel, Gleichen—First day, Relay Race, 1st prize \$100.00; 2nd prize \$50.00

Best Dressed Cowgirl, sixteen years and under, 1st prize \$5.00 by Fred Manu; 2nd prize \$3.00 by W. Parson and 3rd prize \$2.00 by Gleichen Livery.

Best Dressed Cowboy, sixteen years and under, 1st \$5.00 by H. A. Perley; 2nd \$3.00 by A. E. Band, and 3rd \$2.00 by G. H. Taylor & Co. Livery.

Best equipped Cowboy—\$20.00 by Robt. Shaw, M. L. A., Stettler.

Maverick Race—Hardwick Bros., two steers, Chris Bartch, Jack Morton, W. B. Campbell and Lawson & Son one steer each.

Roping—Ranchers Club, Gleichen, 2nd prize \$100.00

THE MAVERICK RACE

The management committee have completed arrangements to feature the Maverick Race somewhat stronger than was at first advertised. This is owing in part to the great interest manifested by entrants in the different events who have made known their desire to participate in this particular contest. The committee have, therefore, made arrangements to turn loose three nimble yearling steers each day for this race and the lucky roper will become the owner of the steer he slaps his rope on first. This event will rank among the most exciting for both participants and spectators.

Italian Reservists In Alberta are Officially Called

Editor Gleichen Call.
I shall be very thankful if
you will kindly publish in your pa-
per the enclosed article. With
many thanks,
Yours truly,
Felice de Angelis,
Italian Consul for North Alberta.

Felice de Angelis, the consul for Al-
berta, has received instructions
from the consul-general in Montreal
relative to the calling of the Italian
reservists for immediate service at
the front.

All reservists in Canada from
class 1876 to 1895 are instructed to
report to Mr. de Angelis' office in
the Bellamy Block, Edmonton.
They are to hold themselves in
readiness to start at a moment's
notice. All expenses from any
point in Alberta to Italy will be
advanced by the Italian government.
Any men who have deserted from
the army or who have evaded
service are informed that they will
be granted a free pardon, if they
promptly present themselves to the
consul.

The Italian government also an-
nounces that all postmen of
military service which may have
been granted for any purpose what-
ever has been withdrawn and these
are expected to report forthwith
and repair to Italy to undergo their
training. Mr. de Angelis states
that there are about 250 of his fel-
low countrymen who will come un-
der these instructions.

Calgary Exhibition

In honor of the six thousand or
more Alberta soldiers who are in
training at the big military camp
in Calgary the fair this year is
being called the "Khaki" fair. The
exhibition "Usual" will be open-
ed by Col. Cruickshank, the
officer commanding this military
district, the fair days will be named
after the regiments taking part and
during the exhibition every regim-
ent will appear. Military bands
will provide the music and in the
evening the military tattoo will be
participated in by seven massed
bands.

With many of the local men is
the regiments their friends and re-
latives will be pleased at the op-
portunity of seeing them before they
leave for the front and will take ad-
vantage of the cheap rates to Cal-
gary between June 30 and July 7,
which are this year's fair dates.

In every department the Calgary
fair is up to the standard and in
some respects ahead of previous
efforts to instruct and entertain.
The prize list has not been out and
stockmen, dairymen, grain growers,
house wives, school children and
many others who habitually con-
tribute to the exhibition will find
their classes open again.
"Forcing the Dardanelles" will
be the big fireworks spectacle and
will be one of the largest and most
realistic pyrotechnic displays ever
produced in the west.

The races will be a strong feature
of each day's entertainment and
the attractive prizes offered are
bringing entries from all over the
Canadian and American west.

Free vaudeville attractions of a
very high order have been engaged
for the performances every after-
noon and evening.

On the midway the "World at
Home" shows will present a large
number of the most attractive en-
tertainments. This is a new aggre-
gation which has never appeared in
the west before and is high class in
keeping with other attractions for
the "Khaki" Fair.

Soon more we would say that
changes for advertisements should be
in this office by Monday noon.

Buy an Irrigated Farm From The CANADIAN PACIFIC RAILWAY BECAUSE:

Irrigation makes the farmer independent of rainfall, and
insures good crops, not occasionally, but every year.

Irrigation makes possible the successful culture of alfalfa,
the king of fodders, which insures best returns in dairying and mixed
farming.

Irrigation means intensive farming and close settlement,
with all the advantages of a densely populated agricultural com-
munity.

Irrigation in the Canadian Pacific Railway Irrigation
Block is no longer an experiment, the year 1911 having absolutely
demonstrated its success whenever intelligently applied.

You can buy irrigated land from the Canadian Pacific
Railway at prices ranging from \$25 to \$75 per acre, with twenty years
to pay and the privilege of a loan of \$2,000.00 for improvements (6%
interest) no principal payment at end of first or second years and no
water rental for first year. Assistance is also given in supplying
stock in approved instances.

This is the most liberal offer of irrigated farm land on
record. Get full particulars from

CRAIGANTLER

L. Selgeon is improving nicely
and he is expected home next week
after being two months in the hos-
pitals at Strathmore and Calgary.
We will all be glad to see him back
again.

Mrs. H. H. Ellis arrived back
from the states much enlightened.
The baby came through the opera-
tion alright and is doing fine. No
doubt the Mayo Bros. of Rochester
deserves the reputation for scientific
operations which in this case looks
like a decided success.

The bridge over the Crowfoot
creek seems almost forgotten about.
The gentlemen in charge had better
get the signatures right away or
winter will be here and we won't
need one this year.

We have only to take the Train-
or case tried last week at Calgary
for addition to our own town of
Standard. There are people who
come around here and who go fur-
ther than to say that it was a good
job the Lusitania was sunk. Now,
it would be advisable in every per-
son's interest to live in harmony and
show our livid toward the flag we
get our livelihood under instead of
looking for trouble. All enjoy a
good joke but in these times we
should be most careful when it
comes to war topics.

J. B. Johannsen has a fine crop
of winter wheat. Nothing like it
in the district.

J. H. Elder is progressing favor-
ably with his big breaking contract
even though the weather is wet.
Jim is a hustler.

We, like all other districts, should
pray for some dry weather. The
weather prophet went a little ex-
tra this year when he said this
would be a dry season.

The farmers around the Standard
district are holding the price of oats
away above what we can buy them

Breeding Hardy Clovers

Method to be Used in Improving the Hardiness of Plants

Red clover, being a self-fertile plant, new varieties and strains must be produced by means of mass selection and hybridization respectively. When breeding red clover, three qualities particularly should be taken into consideration, viz.: winter-hardiness, quantity of seed, and yield of hay.

It has been proven in cereals which the red clover consists of thousands of distinct types, that resistance to disease and hardiness are hereditary characters subjected to the same general laws of heredity as govern the transmission from a mother-plant to its progeny, of strictly morphological characters. It is therefore very reasonable to suspect that winter hardiness in red clover is a hereditary character that can be transmitted from one parent plant to its progeny.

If this be the case, it will be a simple matter to produce a variety able to withstand, without being killed to any extent, the most severe Canadian winter. The task could be accomplished by sowing seed from those individuals which survive after a severe winter and which, therefore, according to our conception, represent hardy "lines" or strains. After sowing the seed thus saved, a progeny may be expected that will prove harder than was the parent crop originally sown, and by saving the seed year after year, a perfectly hardy variety will soon be obtained. This method of improving the hardiness is simply mass-selection effected by nature herself.

Corn cannot exist when Holloway's Corn Cure is applied to them, because it goes to the root and kills the growth.

Dairying is Popular

The eagerness of the farmers of Saskatchewan and Alberta to engage in dairying is evidenced by the success which creamery interests are having in signing up contracts for supplies of cream. A creamery which is arranging to assemble cream at Swift Current, Saskatchewan, reports good success wherever its canvassers have gone, and is now assured of regular shipments from many tributary points. A price of 21 cents a pound for better fat, f.o.b. point of shipment, is offered the farmer. Another evidence of the increasing popularity of the dairy cow is found in reports of an extensive business being done in cream separators, especially in newly settled localities where dairying has not in the past been followed to any great extent.

Paying for the War

The nation is content with the resolve that the task it has undertaken shall be carried through, cost what it may; and it is perhaps rather agreeably surprised to find that the vast amounts of money already raised and spent, and the still vaster expenditure in which it is committed, have imposed no deadly strain as yet upon any class of the community—though the business of paying for the war, it is true, is generally being begun so far as the individual citizen is concerned.—London Times.

A Left-Handed Stab

Physician Instructor—Name the unit of power, Mr. Jones.
Jones (winking up)—The what?
Instructor—Correct. Any questions?
All right. We have a few minutes before the end of the hour in which we will do this problem: A man on a bicycle approached a four per cent grade; how far has he come and will he have to get off and walk?

"I want some cloth to make my doll a dress," announced a little girl of seven as she entered a store the other day.

"How much is it?" she asked when the merchant handed her the package.

"Just one kiss" was the reply.
"All right," she said. "Grandma said she would give you when she came in tomorrow."

Productive Patriotism

The grain acreage in Canada will be increased from 20 to 57 per cent this year. This is the result of the appeal of England that Canada do more to help to feed the empire in the present crisis. Canada is showing its loyalty in a very practical manner and living well up to its watchword of "patriotism and production."

French Islands

May be Annexed to Newfoundland at Close of the War

The possibility that the Miquelon archipelago, the last North American possession of France, may be annexed to Newfoundland at the close of the European war is being given serious consideration.

The little islands of St. Pierre, Miquelon and Langlade, a short distance off the south coast of Newfoundland, have formed for two centuries the advance base for the French cod fishery on the Grand Banks. In recent years the prosperity of the tiny colony has steadily diminished, and all possibility of industrial progress for some time to come was destroyed when the French government in February last summoned all the able bodied men to the front.

It is considered probable that such of the conscripts as survive the war will be reluctant to return to a struggling existence in the colony. Since the usefulness of the fisheries outposts has become slight, it is the opinion of many Newfoundlanders that France will find it to her advantage to turn the islands over to Newfoundland in return for fishing facilities in these waters.

Message of Hope For All Women

MISS MARY SABOURIN TELLS HOW SHE FOUND HEALTH

Suffered For Three Years and Could Find No Lasting Relief Till She Used Dodd's Kidney Pills

Thurso, Que.—(Special)—Tired run-down women can read a message of hope in the statement of Miss Mary Sabourin, an estimable lady living here. In a statement to the public Miss Sabourin says:

"I was a sufferer for three years. I was always tired and nervous. My sleep was broken and unrefreshing. I was troubled with headaches and pains in my back. I had heart flutterings to add to my anxiety.

"I was treated by a doctor and a specialist but nothing seemed to help. I was very low and I started to use Dodd's Kidney Pills and I took just three boxes of them."

Nine-tenths of women's troubles come from sick kidneys. Sick kidneys fail in their duty of straining the impurities out of the blood. That means the poison and disease is left to all parts of the body. The remedy is to cure the kidneys with Dodd's Kidney Pills. If you haven't used them ask your neighbor about them. Nearly every family in Canada is using or has used Dodd's Kidney Pills.

Make Hohenzollern's Pay

"I will venture," says Sir H. H. Johnston in the Nineteenth Century, "to suggest that since Germany has in the main been led into this war by the Hohenzollern dynasty (backed by one or two other princely houses) the private property and domains of these ruling families should be seized by the German state and applied to the settlement of the indemnity, which they would just about suffice to meet."

"When Germany awakens from her dream, from the hypnotic trance into which she has been thrown, and sees things in their proper light, it is on the Hohenzollerns that her eye should justly turn and not on England."

Minard's Liniment, Lumberman's Friend.

The Democratic Warrior King

Here is a story, ringing with the clear note of imperishable romance; it is told by a Belgian soldier in the Nieuwe Rotterdamse Courant:

"I was in the trench, and my brother-in-law was some yards from me. Between us there was a tall officer without arms and silent. Suddenly a shell burst near us. My brother-in-law was struck by a splinter, and fell in a heap at my side. The tall officer took up the rifle and continued the shooting. His extraordinary calm struck me. I ceased to fire and turned to him. He also turned to me. 'Mon Dieu! C'est le Roi!' (It was the King!)"

Filling the Bread Basket

Mars, while bringing sorrow to the homes of thousands of Canadians, is filling the bread basket of other thousands and of our workmen. The supplying of war orders has assumed immense proportions in Canada. Nova Scotia Steel & Coal Co. has received an order for shells which will keep the plant busy for a year. This is only one of scores of orders for munitions of war.—Montreal Journal of Commerce.

Crop Rotation

The One-Crop System in Farming is Dangerous

The one-crop system in farming is hazardous, if not dangerous, to follow. At no time and in no region of the irrigated west, should the farmer be led to just one crop. The old saying, "Put your eggs in more than one basket," is a true but true one today. "The Rotation of Crops" names a system of farm practice which groups field plants with different food requirements so as to give a definite cycle of crops in recurring or successive order. This, if rightly chosen, conserves soil fertility, works for the extermination of certain weeds, insect enemies and crop diseases, while it also prevents the formation of crop sick soils. This latter trouble is caused by the continuous growing of the same crop for a period of years on a given piece of land.

Plants feeding at the same depth, on the same food elements, absorb the readily available portion of these particular foods faster than nature can render them available to plant use. Therefore, there comes a time in this single crop practice when the particular crop plants have so sparingly few and return the farmer or lessened harvests. All crops do not feed alike on the soil. They may use different food elements, or feed on the same elements at different depths. When plants feed at different depths, the deeper feeding plants can draw the food elements which the shallower plants have exhausted, even should they use the same food elements, but, eventually the available plant food becomes exhausted, and that soil is said to be impoverished.

The depositor who continues to draw his money from the bank without making deposits from time to time, will, at last, find his checks returned marked "short." No bank will permit continued overdrafts.

If we practice continued withdrawals, with no food deposits in our soil "banks," we will soon have such a condition that nature marks our checks of withdrawal "short," by giving us a "crop sick" soil—a soil which does not pay profitable crop returns—the available plant food being exhausted.

Then, if market prices fall, the one-crop farmer is sure to suffer a serious loss. These are results of the single crop method of farming everywhere and always. Therefore, we should have a rotation of some kind which will give us a diversity of crop. It is not return per acre that makes the bank and brings a given region prosperity.

Immigration Arrivals

Practically Ceased From Continental Europe Since War Began

With the outbreak of the war and the consequent disorganization of the Atlantic steamship service, immigration to Canada from the mother country and continental Europe has practically ceased. Between August 1, 1914, and April 15, the British immigration arrivals have been 12,090, and the continental arrivals 3,700. Consisting as it does largely of agriculturists, the movement of settlers from the United States to the Dominion is still encouraged by the Canadian government, it being felt that the greater the number engaged in farming operations, the better able we are to provide the food supply required in these times of stress by the empire and our allies. Since the outbreak of the war, 30,000 from the States have taken up their homes in Canada.

Not only has the government continued to encourage immigration from the States, but the greatest care has been taken that no unnecessary barriers be placed in the way of intercourse between the two countries. There is an immense trade between Canada and the neighboring republic, which necessitates constant crossing of the international boundary by commercial travellers and other business men. There are in both countries hundreds of places of scenic beauty and historical interest, which attract the tourist, and realizing the advantage in money to be derived from this class of traffic, officials have been instructed to continue the same courteous treatment to the bona fide travelling public as was customary before the war. It is pointed out that the United States citizen need not go to the trouble or expense of securing passports, nor will unnatural restrictions be placed in the way of his entry into this country for peaceable purposes be in any way interfered with.

Agricultural Instruction

Dominion Government Entering Into Agreements for Provincial Expenditures

Agreements which have been entered into between the Dominion department of agriculture and two of the provincial governments, provide for important advances in agricultural instruction under the agricultural instruction act. Ontario and British Columbia are the two provinces with which agreements have been made so far, but agreements with the other provinces are on the way and probably will be completed in the future. The Ontario agreement provides for an expenditure of \$266,013.05. A good deal of this amount will be spent on the extension work already in progress. The British Columbia program provides for an outlay of \$58,255.94, out of which the usual demonstration work will be carried on and \$15,000 will be used for agricultural instruction in the public and high schools of that province.

Feeding Work Horses

Proper Feed to Maintain Horses in Good Working Condition

After many tests made at the experimental farm, Ottawa, hay, bran and oats have been found the best feeds for work horses. The hay is fed long and the oats and bran in the proportion of two parts oats to two parts bran, mixed and fed dry. Warm bran makes five to six pounds per horse, are used on Saturday nights to replace the regular bran ration. When horses are of very heavy work, the proportion of bran is decreased to one part for five parts oats. A safe standard for feeding draught horses, and one commonly used, is that of giving from one to one and quarter pounds of the above grain mixture and one pound of hay for each 100 pounds live weight; this, of course, subject to variation depending on the severity of work, condition of animal when fed, the health of animal, and other minor considerations.

The morning feed, about 5 a.m., consists of about three-eighths of the total grain mixture and one-quarter of the hay and about one-half the hay for the day.

Water is supplied after the morning feed and before the noon and evening feeds. During the winter, water is also supplied in the evenings, some three hours after the feed.

With the above treatment, the horses are maintained in good working condition, and with an almost entire absence of common stomach and intestinal ailments such as indigestion and colic. No condiments are used, but to horses somewhat low in flesh and requiring more feed, molasses mixed with the grain used in small quantities, as it stimulates the appetite by increasing the palatability of the food.

ALMOST FRANTIC WITH SKIN TROUBLE

On Right Side to Hip. Pain Intense. Blisters and Red Swollen Pimples. Could Not Sleep. Cuticura Soap and Ointment Healed.

1200 City Hall Ave., Montreal, Que.—

"The trouble began last summer. I noticed that I was becoming fidgety and unable to keep my arms at my sides. I put some talcum powder in my armpits where the pain was most intense, but while it eased the pain for a little while it afforded no relief. It gradually came down my right side to my hips. At first it was only one continuous red streak, but it transformed itself into blisters and red swollen pimples. The pain was so intense that I was forced to hold my right arm in a horizontal position so that it would not rub against me. I could not sleep; I was almost frantic with pain."

"I used two or three different kinds of salves and powders without effect. I had had the trouble about six or seven months before I came across an advertisement of Cuticura Soap and Ointment. The first night I put the Cuticura Soap and Ointment on I felt as if a piece of ice had been put on my side. It was so refreshing and cool. I continued using Cuticura Soap and Ointment until I was completely cured." (Signed) A. Simpkins, July 8, 1914.

Drafting Dogs for the War

Stray Canines in Vienna Are Rounded up and Sent to the Front For Military Service

When the dog catcher of Vienna runs across a well built, well fed, unregistered dog, says a correspondent of the Chicago Daily News, he no longer thrusts him into a wire cage and hauls him off to the dog pound. He says, "Come along to the recruiting sergeant."

For Austria has found a new use for stray dogs. They go to war. They are going in squads, in companies and in battalions, out beyond the Carpathians, to help Austria soldiers stand guard on the outskirts of the army, to procure valuable information about the enemy and to act as faithful members of the Red Cross relief corps.

Like the dogs of the St. Bernard Mission, high in the Alps, these war dogs—some of them—are to rescue human beings. It is well known that wounded men frequently crawl into the deepest underbrush of the forests. To find these men, to carry them temporarily to safety and finally to lead the Red Cross men to their side will be the principal task of the dogs, although some will assist the patrols or stand guard with the outposts through the night, listening for sounds from the direction of the enemy. Other dogs will be sent out to determine whether trenches of the enemy have been evacuated or are still occupied, information usually gained only with danger to the soldiers.

A big force of these dogs of war left Vienna with military banners the other day. Twenty Red Cross men staff of the Red Cross formally welcomed the dogs to the railroad station. It was a great day for dogs. Each recruit wore a spray of flowers in his collar.

At the station the customary formal programme, never omitted in Austria, was given. A physician of the general staff of the Red Cross formally welcomed the party. The physician in charge of the dogs formally replied. Both addresses were delivered in polished rhetorical German. What the words meant to the dogs no one knows, but it is safe to say that they enjoyed to the full the distribution of the flowers which followed. They left yelping, barking and wagging their tails furiously.

Austria is training more dogs, and the increase demanded is likely to make serious inroads on Vienna's dog colony. But there is one consolation for the Viennese—the dachshund, or turnip dog, has so far been declared ineligible. It is said that at the dog catcher viewed the concourse of polished aristocratic "dachshund" as his legitimate prey. The cafe loungers and the boulevardiers, who like to lead the animals around, objected. The dog catcher said he thought the dogs would be valuable in the trenches, because they kept their stomachs close to the ground. But the protests won the day.

Germany began using dogs for relief work on the battle fields in 1870, and when the present war broke out various societies of dog fanciers quickly took up the movement to furnish dogs to the army. It is said that Germany now has more than two thousand trained dogs in the field.

Not the Way to Win Wars

Reprisals Not a Deterrent, But Rather a Spur to War

In an article in the Vorwarts, headed "A warning word to all who are concerned," Eduard Bernstein, socialist and former member of the reichstag, protests against reprisals which go beyond the conduct of warfare in the usual sense of the word.

The sinking of the Lusitania, coming as a climax to former incidents of a similar nature, together with the badly abused comments on these incidents in German newspapers, resulted in excesses against Germans in England and in the colonies, as well as in the United States," Mr. Bernstein writes. "These excesses are regrettable, but they are directed against persons not responsible for what has been done. They are also regrettable from a political viewpoint, because they form another step on the ominous path which leads to nothing else than multiplication of the already deep wounds the wars cause."

Advocates of reprisals will find it extraordinarily difficult to point to a single case where wars between civilized peoples have been won by such methods. The voices we hear from other countries, which hitherto have been outside the war territory leave us in doubt that in the measure in which one or the other side among the belligerents outdoes the other in reprisals that side wins for itself the strongest opposition of those countries.

"Among the people against whom reprisals are employed most strongly, but incites them to war to the utmost."

Herr Bernstein adds that lack of moderation in methods does not prove strength and that the nation which understands how to set limits to the tendency to outdo the other in reprisals, proves itself stronger than the one which tries to exceed in reprisals.

Are Investigating the Constituents of Soils

University Will Publish Results For Benefit of the Province

The university is continuing the work began last year in investigating the constituents of Saskatchewan soils, so as to determine the causes of fertility. Three chemists and one physicist, all graduates of the university, are busy now working on the chemical and physical properties in the laboratories of the institution. Some of the samples of soil being tested are those taken from the experimental plots on the university farm, under the management of Prof. Bracken, so as to determine the effect of plants on amount of nitrogen, potash and phosphates that are present naturally by fertilization. When sufficient data has been collected there will be published a bulletin for giving information to the people of the province. Dr. MacLaurin and Dr. Hogg are in charge of the work.—Saskatoon Star.

The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Prohibition Causes Increased Savings

A report from Petrograd says that M. Kharitonoff, controller of the Russian treasury, speaking before the Duma budget committee, declared that owing to the great increase in national savings, due to prohibition, the extraordinary outlay occasioned by the war as yet had caused no great suffering in Russia.

As proof of this M. Kharitonoff said the national savings in December, 1913, which amounted to 700,000 roubles (\$350,000), had increased to 29,100,000 roubles (\$14,550,000) in December, 1914. He added that the total savings for 1913 amounted to 24,000,000 roubles (\$12,000,000), as compared with 84,000,000 roubles (\$42,000,000) for 1914.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation warranted to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

"Mary" said her aunt to the little girl from the city, "you might go out into the barn and see if you can't find some eggs."

The little girl was gone awhile, then returned with an expression of mingled disappointment and disgust. "Did you find any?"

"No, auntie, not one. There's just a lot of chickens out there, standing around doing nothing."

Justice of Peace Praises Dr. Chase's Ointment

After Nine Years of Agony He Escaped an Operation by Using This Great Healing Agent.

As a means of healing sores and wounds that defy ordinary treatment Dr. Chase's Ointment has long stood supreme. It is known far and wide as a positive cure for eczema and piles. Whatever uncertainty there may be about the results obtained by the use of Dr. Chase's Ointment, there can be no question of the healing of the skin when Dr. Chase's Ointment is applied.

You can actually see just what takes place. The sore parts are cleansed,

and gradually the new skin is formed and the sore becomes smaller and smaller, until it finally disappears. It is often wonderful the results which are accomplished in a single night by the use of this great healing ointment. Mr. N. A. Heath, J.P., Fitch Bay, Que., writes:—"Nine years ago I was taken with an abscess, and cannot begin to describe what I have suffered as a result. I was examined by two doctors, both of whom said I would have to undergo an operation to be cured. Thanks to Dr. Chase's Ointment, it has rendered an operation unnecessary, and has completely cured me. I cannot say enough in praise of this wonderful ointment which cured me after nine years of agony."

Alberta Estray Law

The Alberta Estray Law prescribes that the person who takes up an estray animal must immediately notify the brand recorder and return the animal to its owner and come out and examine the animal and take a copy of the brand, if any, on the animal. Then the advertisement must be inserted in the nearest local paper and also in the Alberta Gazette, and until the law is complied with, no fee for the animal can be collected any person who takes up an estray animal. A fee for the animal is charged, and the fee for the advertisement and the reading of the brand is a charge against the estray animal and must be paid by the person who takes up the animal. The person who takes up the animal is responsible for the animal. No charges for feed are allowed between the 15th day of April and the 15th day of November. From November 15th to the 15th day of the next year, the person who takes up the animal is allowed for horses and cattle during the day of the month the notice is mailed to the owner of the estray animal. South of the 50th township only five cents a day is allowed for feed and the total cost is limited to three dollars.

Queenstown Notes

Whatever troubles we may have this winter will not be dried out.

Miss Monroe has an exceptional line of broom, grass this year.

Mr. and Mrs. J. Asgaard made a trip to **Calhoun** lately in the auto.

Mr. McCabe can show the earliest vegetable garden in **Queenstown** this year.

John L. Ebbel returned with his family from **Chicago** the first of the month. He says **Queenstown** looks better to him here before.

The population out here is steadily increasing. There is a new boy at the **Gleichen's** home and a girl at **Chas. McIntyre's**.

Cutworms have done considerable damage west of the lake this spring and several patches have had to be removed.

A great wedding is scheduled to come off east of the lake sometime in June. More particulars later.

It is hardly necessary to state that all the **Queenstown** farmers look happy right now. Crops certainly look fine and if the good prices keep up and nothing else happens the farmers will come into his own this year.

The mosquitoes, the advance guard of the summer, are again with us and are liable to keep us in the jump for the next couple of months.

This year the **Farmers Union** will hold their annual picnic at **Lake McGregor**, near the dam. A large pavilion, 80 feet long is to be erected up for dancing, etc. The date of the picnic is **Monday Day** July 1st.

John L. Ash has purchased the best half of section 7-19-20 next to his own land. **John Shielde** has bought the south-west quarter of section 1-21-21 and is fencing it.

The long delayed **Mills** wedding dance came off in the **Pioneer** school Friday evening, June 4th, there was a good crowd and a fine time for all.

At the last meeting held by the **Farmers Union** it was decided to make the **Pioneer** school the permanent meeting place and to meet regularly every month, the meetings to follow close on the meeting dates of the **Gleichen Farmers Union**. The secretary was instructed to communicate with the **Gleichen Union** regarding the matter and then notify the members of the next meeting.

The **Grain Growers Guide** for June 2nd contains an article on summerfall writing by **Sage Wheeler**, **Rosten Sak**. Every farmer in this district ought to read this and not get the "grub" should send for samples. Of course there are farmers who may not need information and others who will not take any advice from farm journals, but here is an exception. **Mr. Wheeler** has been a successful farmer for 20 years and has raised good crops when others had none. **Twice Mr. Wheeler** has been awarded first prize for the world's best bushel of wheat at the **International Dry Farming Congress**. Two years ago when at the **Dry Farming Congress** at **Lethbridge** it had a chance to look at a display grain exhibited by **Mr. Wheeler** and it was worth going a long way to see. In short any advice given by this man is worth considering.

THE GLEICHEN CALL.

LOCAL AND GENERAL

Hon. Chas. Mitchell visited here Saturday and spent some time looking over his farm south of town. While here he remarked upon the improvements in the town since his last visit and said the towns appeared the most prosperous of any of its population he knew of. He remarked that the number of autos on the streets have exceeded any town he knew of which thought, was the very best indication of the prosperity of the people. He thought the **Fort** agent should be congratulated on the number of that make he saw.

Now don't forget the **Tag Day** on 24th and 25th when you are enjoying yourselves stop a moment and give of the needs of our wounded and give freely and give liberally to the cause. It is the duty and privilege of all of us as to how to do this and do it often until this terrible war is brought to a close by the victory of the allies and which can be won only by the help of our support in money and power. Remember this appeal to you, so pay, pay and don't forget the **Red Cross** day.

James Cameron, manager of the **Bank of Commerce** here, has received word from the **Iron Machine** brother was badly wounded by shrapnel in the spine. He went to war with the 60th Battalion of **Light Horse**, **Southwest**. **Mr. Cameron** has two other brothers at the front, one having gone from **Fort William** and the other from the east coast of **Scotland**.

Only occupied about an hour of **Judge Carpenter's** time on Friday last to attend to the duties of holding the court of confirmation for the tax enforcement record of **Gleichen**. He spoke congratulatory of the way he found everything being done and remarked it was a pleasure to visit here considering the difficulties that be found in other towns.

At a London meeting **Mr. Bonar Law**, now Secretary for the Colonies told a story about a Canadian soldier who captured a German machine gun against the enemy until each was in turn destroyed, and then took a rifle until he was himself killed and he was one of the contingent, whose "lack of discipline" while at **Gleichen** caused some of the winners to shake their heads.

Roy M. Allen, proprietor of the **Gleichen Livery Barn** is the first to install the town water works system in a livery stable here and says he is very much pleased to be able to inform his customers that they can always count on their horses getting plenty of water and feed at his stable. He is offering his gasoline outfit for sale at a bargain.

Many **Gleichen** friends will be pleased to learn that **Andy K. Tenness** is still in **Southwest**, **Saskatchewan**. His capture was received by **Chas. Cameron** on a post from his last week. Some had feared that he might be among the missing at the war front.

Manager Jense of the **P. C. S. baseball team** was tickled over because his picked team put it over the **Regina** team 22 to 7. Shortly after the game he was told that he was a sure home-batter manager and made a home-run all by his lone home.

The **Hicks Trading Co.** will be closed all day tomorrow—**June 18th**—in order to prepare for the big clearing opening the following morning, **Saturday**.

E. P. Guay, secretary of **Mr. W. Garstep**, member of municipalities at **Edmonton**, is visiting his wife, **V. G. Guay** of **Quakwaka**.

S. A. Hall has just received a fine line of **Classis Shoes** for children for which he is sole agent.
